Mylonas Charilaos

Work Experience

Sept 2016–Sept 2021 — **ETH Zürich**
PhD Candidate / Research Assistant

- Conceptualized and implemented novel applications of graph neural networks to structural condition monitoring and statistical modeling for wind farms (Python/TensorFlow/distributed computing)
- Conceptualized novel applications of generative models to damage accumulation
- Contributed to open-source wind turbine and wind farm simulation library
- Implemented and open-sourced a message-passing GNN library (`https://github.com/mylonasc/tf-gnns/`)

Dec 2015–Sept 2016 — **ETH Zürich**
Research Assistant

- Implemented and tested automated hyper-parameter tuning and training strategies for a CP-tensor decomposed regression module
- Implemented and tested various numerical algorithms related to uncertainty quantification
- Co-authored technical reports and documentation

Jul 2014– Dec 2014 — **Credit Suisse**
Full-Stack Software Developer (internship)

- Implemented and validated in C++ an R interface for an option pricer, achieved more than 10-fold improvement by replacing pre-existing interface.
- Implemented a REST server to retrieve data from a MySQL timeseries database and an interactive web GUI for time series visualization.
- Implemented a web-based script editor for an internal domain specific language for sharing time series processing pipelines and visualizations.
- Developed unit tests & benchmarks for the created code, including automated inter-commit benchmarking scripts.

Education

Sept 2016 – Sept 2021 — **ETH Zürich**
PhD in Machine Learning for Structural Health Monitoring under Uncertainty
Expected graduation: September 2021
Advisor: Prof. Eleni Chatzi

Sept 2012 – Sept 2015 — **ETH Zürich**
M.Sc. in Computational Science and Engineering
Thesis: *Shape Optimization with Boundary Elements*
Advisor: Prof. Ralf Hiptmair

Sept 2005 – May 2012 — **Aristotle University of Thessaloniki**
Dipl. Ing. Civil Engineering
Thesis: *Computational homogenization for composites with the finite element method.*
Advisor: Prof. Nicolas Charalambakis

Technical Strengths

Programming	Python · Matlab · R · Java · JavaScript · C++ · SQL · Bash
Software Development	machine learning algorithms · deep learning · scientific computing · software design · test-driven development · full–stack web development
Other relevant skills	distributed/parallel computing · computer vision

Other information

Teaching assistant roles

· High Performance Computing for Computational Science and Engineering (2020) (Prof. O. Schenk)
· Method of Finite Elements (2017 – 2019) (Prof. E. Chatzi)
· Linear Algebra Lab (2008) (Prof. Chara Charalambous)

Other academic engagement

· *Student project supervision* 6 M.Sc. theses and semester projects and consulted on several others
· *Reviewer assignments* for Mechanical Systems and Signal Processing and Journal of Sound and Vibration

Distinctions and Certificates

· **Best paper award** in 39th IMAC conference (Feb. 2021) for the paper "*On an application of graph neural networks in population based SHM*"
· *Human Subject Reseach Certificate* (Data or Specimens Only) CITI-Program Training (April 2020)
· **SIAM Gene Golub Scholarship** for PhD summer school on "*High-Performance Data Analytics*" *Aussois, France 2019*

Selected Publications

May 2021 ***Mylonas, C****, Abdallah, I, Chatzi, E.* Relational VAE: A Continuous Latent Variable Model for Graph Structured Data (`https://arxiv.org/abs/2106.16049`) under review, NeurIPS 2021)
