👤 Mylonas Charilaos

Work Experience

SEPT 2016–SEPT 2021

ETH Zürich

PhD Researcher

- Conceptualized and implemented novel applications of graph neural networks to structural condition monitoring and statistical modeling for wind farms (Python/TensorFlow/distributed computing)
- Conceptualized novel applications of generative models to damage accumulation
- Contributed to open-source wind turbine and wind farm simulation library
- Implemented and open-sourced a message-passing GNN library (<https://github.com/mylonasc/tf-gnns/>)

DEC 2015–SEPT 2016

ETH Zürich

Research Assistant

- Implemented and tested automated hyper-parameter tuning and training strategies for a CP-tensor decomposed regression module
- Implemented and tested various numerical algorithms related to uncertainty quantification
- Co-authored technical reports and documentation

JUL 2014– DEC 2014

Credit Suisse

Full-Stack Software Developer (internship)

- Implemented and validated in C++ an R interface for an option pricer, achieved more than 10-fold improvement by replacing pre-existing interface.
- Implemented a REST server to retrieve data from a MySQL timeseries database and an interactive web GUI for time series visualization.
- Implemented a web-based script editor for an internal domain specific language for sharing time series processing pipelines and visualizations.
- Developed unit tests & benchmarks for the created code, including automated inter-commit benchmarking scripts.

Education

SEPT 2016 – SEPT 2021

ETH Zürich

PhD in MACHINE LEARNING FOR STRUCTURAL HEALTH MONITORING UNDER UNCERTAINTY

Expected graduation: September 2021

Advisor: Prof. Eleni Chatzi

SEPT 2012 – SEPT 2015

ETH Zürich

MSc in COMPUTATIONAL SCIENCE AND ENGINEERING

Thesis: *Shape Optimization with Boundary Elements*

Advisor: Prof. Ralf Hiptmair

SEPT 2005 – MAY 2012

Aristotle University of Thessaloniki

MSc Civil Engineering

Thesis: *Computational homogenization for composites with the finite element method.*

Advisor: Prof. Nicolas Charalambakis

Technical Strengths

Programming

Python Matlab R Java JavaScript C++ SQL Bash

Software Development

machine learning algorithms deep learning scientific computing
software design test-driven development full-stack web development

Other relevant skills

distributed/parallel computing computer vision

Other information

Teaching assistant roles

- High Performance Computing for Computational Science and Engineering (2020) (Prof. O. Schenk)
- Method of Finite Elements (2017 – 2019) (Prof. E. Chatzi)
- Linear Algebra Lab (2008) (Prof. Chara Charalambous)

Other academic engagement

- *Student project supervision* 6 MSc theses and semester projects and consulted on several others
- *Reviewer assignments* for Mechanical Systems and Signal Processing and Journal of Sound and Vibration

Distinctions and Certificates

- **Best paper award** in 39th IMAC conference (Feb. 2021) for the paper “*On an application of graph neural networks in population based SHM*”
- *Human Subject Research Certificate* (Data or Specimens Only) CITI-Program Training (April 2020)
- **SIAM Gene Golub Scholarship** for PhD summer school on “*High-Performance Data Analytics*” Aussois, France 2019
